

# Equipment Management:

We have one of the largest privately owned collections of construction equipment in North America.

We are a North American center for infrastructure construction excellence. We, Canada's Surerus Murphy Joint Venture and the USA's WHC – A Surerus Murphy Company, are a partner in building pipelines, facilities that enable the energy sector and power projects throughout North America, with projects focused throughout the Gulf Coast and Western Canada. We prioritize building safely and delivering quality. We want to be a contractor of choice for our existing and future clients, and that means we work diligently to ensure assured delivery on everything we do. Our large fleet selection provides value to our clients as we can assure equipment availability as we are not reliant on an external vendor.

**Work Trucks**  
Qty: 426

**Auto-Welding Bug CRC**  
Qty: 100

**Auto-Weld Hut/Shack**  
Qty: 57

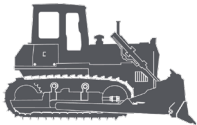

**Mainline Auto-Weld Rigs Tracked**  
(Tack rig/ shack carrier)  
Qty: 20

Excavator 25T | Qty: 26  
Excavator 30T | Qty: 26  
Excavator 35T | Qty: 189  
Excavator 45T | Qty: 41  
**Total Qty: 282**

Sidebooms PL72 / 572 | Qty: 41  
Sidebooms PL83 / 583 | Qty: 77  
Sidebooms 594 / 355 | Qty: 19  
Sidebooms PL87 / 587 | Qty: 92  
**Total Qty: 229**

Dozer D6 | Qty: 72  
Dozer D7 | Qty: 20  
Dozer D8 | Qty: 28  
Dozer D9 | Qty: 2  
**Total Qty: 130**

**Tie-in Auto-Weld Rigs Tracked**  
(Shack carrier)  
Qty: 14

**Padder Screeners**  
Qty: 9

**Tie-in Auto-Weld Rigs Wheeled**  
6X6 (Shack carrier)  
Qty: 22

**Lowboy Tractor Trailers**  
Qty: 50

**Sandblasting/Coating Rig Tracked**  
Qty: 4

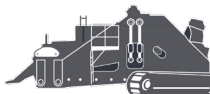

**ATV's**  
Qty: 45

**Sandblasting/Coating Rig Wheeled**  
Qty: 36

**Motor Graders**  
Qty: 18

**Bending Machines 12" - 48"**  
Qty: 7

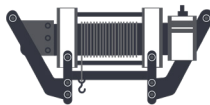

**Rock Trucks**  
Qty: 57

**Tracked Carrier**  
(Moroka or equivalent)  
Qty: 20

**Trenchers**  
Qty: 14

**Winches**  
(static and mobile < 250 ton)  
Qty: 16

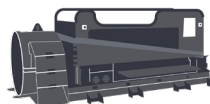

**Rock Crushers**  
Qty: 6

Telehandler | Qty: 35  
Loaders | Qty: 35  
Skid Steer | Qty: 54

**Fuel Trucks**  
Qty: 18

**Auger Bore Machines and associated equipment**  
Qty: 15

**Farm Tractors**  
Qty: 16

**Pile Drivers (Vermeer PD10)**  
Qty: 20

## Equipment & Fleet

We have over 1600 pieces of heavy construction equipment and on-highway heavy transport and construction support vehicles. This equipment fleet can handle any size of civil or earthworks project, making this fleet one of the largest privately owned fleets in North America.

## Earthworks

We have a large earthworks fleet that consists of bulldozers, excavators, articulated trucks, loaders, tractors, motor graders, soil compactors and ditching and trenching equipment. The size categories of our construction equipment range from small compact equipment to large earthworks. Our smaller equipment complements constricted or ground-pressure sensitive work areas while our larger earthworks equipment, such as our 90-ton excavators and 48-ton dozers provide efficiencies in large-area work environments. With over 50 haul trucks, we can bulk transport massive quantities of material on any worksite. We also carry a specialty fleet of ditching equipment that includes chain and wheel ditchers that range from 16-inch up to a 73-inch-wide trench.

## Pipeline Fleet

We have a large quantity of sidebooms and pipelayer equipment specific to pipeline construction. With over 150 sidebooms ranging from 18-ton to 120-ton lift capacity and pipe-loading capacity with deckhands ranging up to 70-ton excavators, we can handle any size of pipe from small-inch to large-inch. We carry a variety of support equipment for the pipeline sector that includes tracked and wheeled tach rigs, sandblast and coating equipment and heat induction units.

### Specialized Units

- Sidebooms
- Pipe Bending Machines
- Auger Bore Machines
- Auto Weld Equipment
- Specialized Semi-Automatic Welding Units (for all types of work environments and ground terrain)

Auger bore Machines

Sidebooms

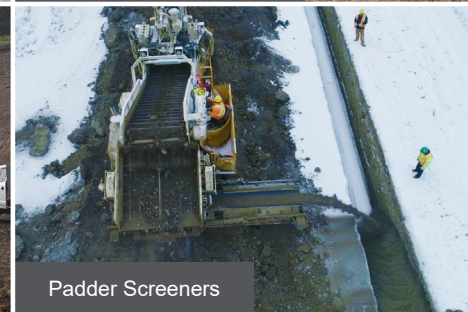

Welding Bugs

Lowboy Tractors Trailers

Bending Machines

Padder Screeners

Rock Crushers

Excavators

Trenchers

Auto weld tie-in rigs (wheeled 6x6)

Motor Graders

Auto Weld Tie-in Rigs (tracked)

Winches

Auto Weld Equipment

## Rolling Fleet

Our on-highway fleet has the capacity to support any level of project – large or small, congested or rural. Our fleet consists of heavy transport equipment trailers that can move up to 90-ton machinery. We also have a substantial fleet of heavy re-fuelers, lube and service trucks, as well as roll-off and crane trucks in 2wd and 4wd configurations that can handle adverse conditions. Picker trucks are also essential to construction execution; our fleet has many picker/crane trucks that range from 5-ton to 70-ton lift capacity.

## Technology

Using innovative, accurate and smart technology is critical for real-time fleet maintenance. Among our deployed technology tools are mechanisms in our fleets that provide data on driver behaviour and machine control capabilities. Our fleet incorporates telematic technology to give minute-by-minute data of vehicle condition, driver behaviour, idle management and maintenance reminders to ensure we are getting maximum benefit and efficiency from our fleet. We invest in grade- and machine-control for our earthworks fleet. Our engineers design 3D site plans that can be downloaded into our earthworks fleet that support our commitment to safety. This information provides operators of the exact grade file and contours to follow.

## Maintenance Program

To maximize productivity, reduce operating costs and manage utilization of equipment, our fleet is automatically enrolled in a maintenance management program. We use customized software that indicate when a piece of equipment is due for a check-up, making sure all regular service checks, inspections, annual certifications and ongoing fleet management governance is monitored by a team that ensures no asset is noncompliant with our standards or those set by a manufacturer or any regulatory body. Our maintenance and governance of our fleet maximizes the lifecycle of our equipment and contributes to our ability to provide quality equipment on all our projects.
